

## **Azure Solutions Architect & Senior Developer**

**Number of Posts:** 1

**Contract Type:** Full time – Permanent

VITAL4DATA is a dynamic growth stage, Women-owned technology company located in Malta and the US. We are poised and ready for explosive growth and looking to grow our team in our newest location in Malta. Founded in 2016 right outside of Atlanta, Georgia, USA by a group of veteran background screening industry experts, VITAL4DATA® (or dba V4 or VITAL4®), VITAL4 provides data, screening and monitoring to companies all over the world to help mitigate risk.

Our screening and monitoring solutions are being used by the largest global background screening companies, Fraud and Risk Tech Platforms, FinTech's, Banking, Insurance, Transportation, and Corporates, so they can minimize doing business with and employing "bad actors".

We are looking for likeminded people to join our mission to stop financial crime, bribery and corruption one customer at a time. We have proven success by being the first in the world to deploy artificial intelligence and machine learning driven screening technology and data solutions to the industry, which means you will be continuing our efforts in providing the best in breed technology available anywhere in the world for our client industries.

### **Job description**

You're a passionate cloud application architect with years of real-world experience implementing and managing customer facing application architectures on Azure. You have broad experience designing and developing .NET applications, with an eye towards emerging standards and frameworks. You have leveraged Azure to implement and manage robust high availability and scalability in a modern devops environment.

### **Some of your duties include:**

- Design, build & implement powerful, globally available Azure services and applications.
- Provide technology assessments to help keep performance up and costs down.
- Staying on top of the .NET/Azure ecosystems to guide us into the future.
- Helping the team automate tasks, so that we can spend more time creating!

### **Requirements:**

- Experience provisioning and running services and apps on Microsoft Azure Cloud (4+ years) - Azure certification is preferred.
- Strong .NET development experience, WebAPI and Service Fabric applications preferred.
- Experience delivering Azure DevOps concepts such as test plans and CI/CD pipelines.
- Experience with SQL Server and understanding of relational database optimization and configuration.
- Windows Server
- Linux Server

## Vacancy Additional Information

### **Nice-To-Haves:**

- Azure Certification
- Elasticsearch
- Natural Language Processing/Text Analytics
- IBM SPSS
- FinTech/RegTech/ComplianceTech experience
- Web Scraping/ETL development

### **What we are offering you:**

- An amazing opportunity to be on the ground floor of a thriving FIN-TECH software company, where your skills are honored, and you have the ability to grow exponentially in your career and success.
- A team of experienced and passionate developers ready to support your vision.
- The latest cutting edge and best of breed technology to ensure you stay ahead, while applying what you learn to ensure VITAL4's systems exceed what is present in the market.
- A culture experience in a newer booming industry, where your opinion matters. We work hard and play harder, while maintaining work-life balance and developing working relationships that will support us all, throughout our careers. Employee satisfaction is a primary measurement of our overall success.

### **Any assistance with accommodation/relocation**
